## **CTR POISES FOR EXPANSION IN 2011**

*Introduction of New Service Lines Will Bring New Jobs to Region*

WARRENDALE, PA (February 28, 2011) — CTR Systems, a leading provider of parking and access control solutions, is preparing to initiate service lines that will bring new jobs to the region this year.

CTR has budgeted for an additional 15 full-time employees to manage its expansion efforts in 2011.

“In a difficult economy, we are pleased to be in a position to bring new jobs to our community,” said Doug Duffy, CTR president. “In addition to providing valuable career opportunities for talented individuals, our new products and services will help more businesses succeed by helping them streamline operations and increase revenue.”

CTR Systems’ new product lines and services will provide businesses nationwide with new parking management tools. CTR specializes in methods of tracking and collecting parking fees in a variety of settings from on-street parking locations, to surface lots, to garage complexes. The new offerings will complement CTR’s already robust parking and revenue control options, which include gates and access control measures, electronic message systems for traffic control, pay and display systems to facilitate self-parking and state-of-the-art license plate recognition programs.

### **About CTR Systems Inc.**

CTR Systems Inc., based outside of Pittsburgh, Pa., in Warrendale, is a single-source provider of products and services for time & attendance, payroll & human resources, parking revenue control and access control. Since 1964, we’ve been working with businesses small and large to develop integrated systems for their workforce, revenue and facilities management needs.
