CTR SYSTEMS LANDS AIRPORT ACCOUNTS TOTALING MORE THAN \$7M

WARRENDALE, PA (October 22, 2010) — CTR Systems recently obtained two large airport parking accounts totaling \$7.5 million. CTR Systems will begin work soon on Ronald Reagan Washington National Airport and Hartsfield-Jackson Atlanta International Airport.

Metropolitan Washington Airports contracted CTR Systems for work on Ronald Reagan Washington National Airport in early October. The \$4.3 million contract entails pulling out the old existing system and installing new CTR equipment. CTR was chosen for its ability to incorporate reliable hardware and sophisticated software with an experienced project management team that delivers and supports from start to finish.

CTR was also awarded the Hartsfield-Jackson Atlanta International Airport terminal parking garage new construction contract, which entails entry, exit terminals, pay-on-foot machines, automatic vehicle identification (AVI), and license plate recognition (LPR) software. CTR Systems was chosen over the competition for the \$3.2 million contract because the company is known for exceptional hardware and has a proven track record for implementing these types of enterprise accounts.

About CTR Systems Inc.

CTR Systems Inc., based outside of Pittsburgh, Pa., in Warrendale, is a single-source provider of products and services for time & attendance, payroll & human resources, parking revenue control and access control. Since 1964, we've been working with businesses small and large to develop integrated systems for their workforce, revenue and facilities management needs.
